

Sequence Diagram

Explanation:

- Steps 1 to 2 to 3 to 4 user creation. Requests travelling from user to client, server back to app.
- Steps 5 to 6 to 7 task management with DB sync and dashboard rendering
- The **opt** combined fragment for the LLM flow.
 - Client sends prompt to server.
 - Server forwards it to LLM.
 - LLM generates tasks; sent to Client for approval.
 - If approved by the client synched to DB and rendered into the user dashboard.
