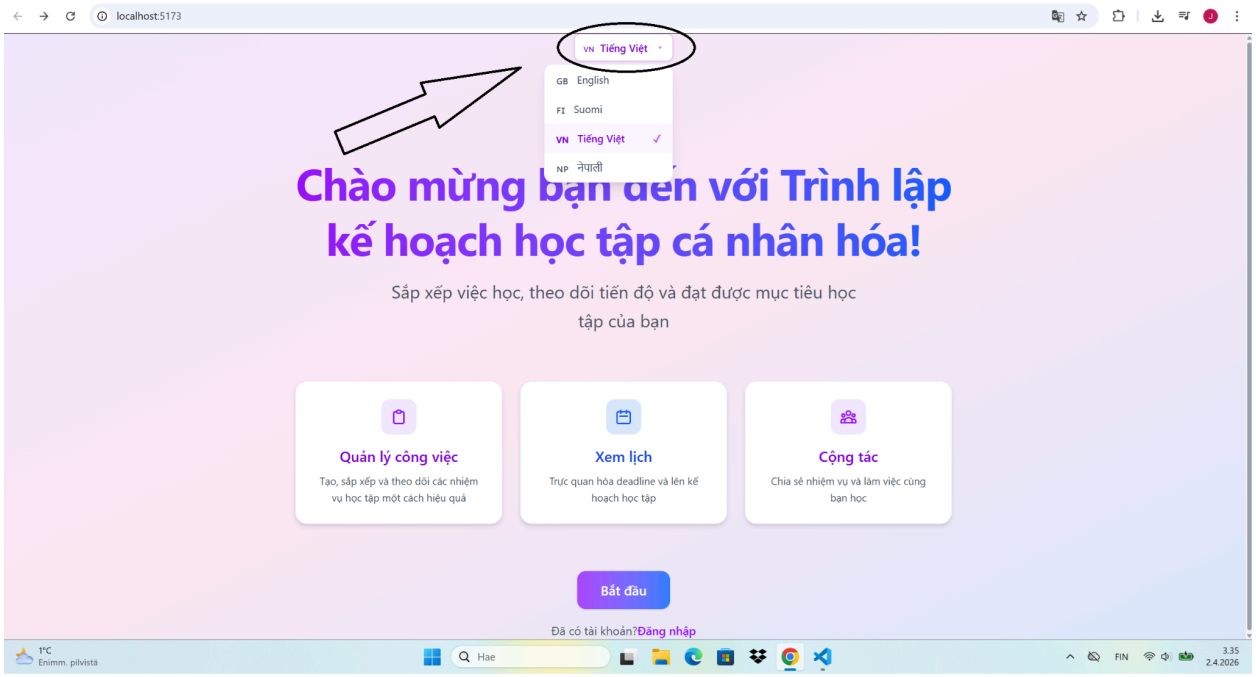
Localization languages:

Languages available:
-Nepalese (Aashish/Mahi)
-Vietnamese(Minh)
-Finnish(Jari)
-English(Every member)

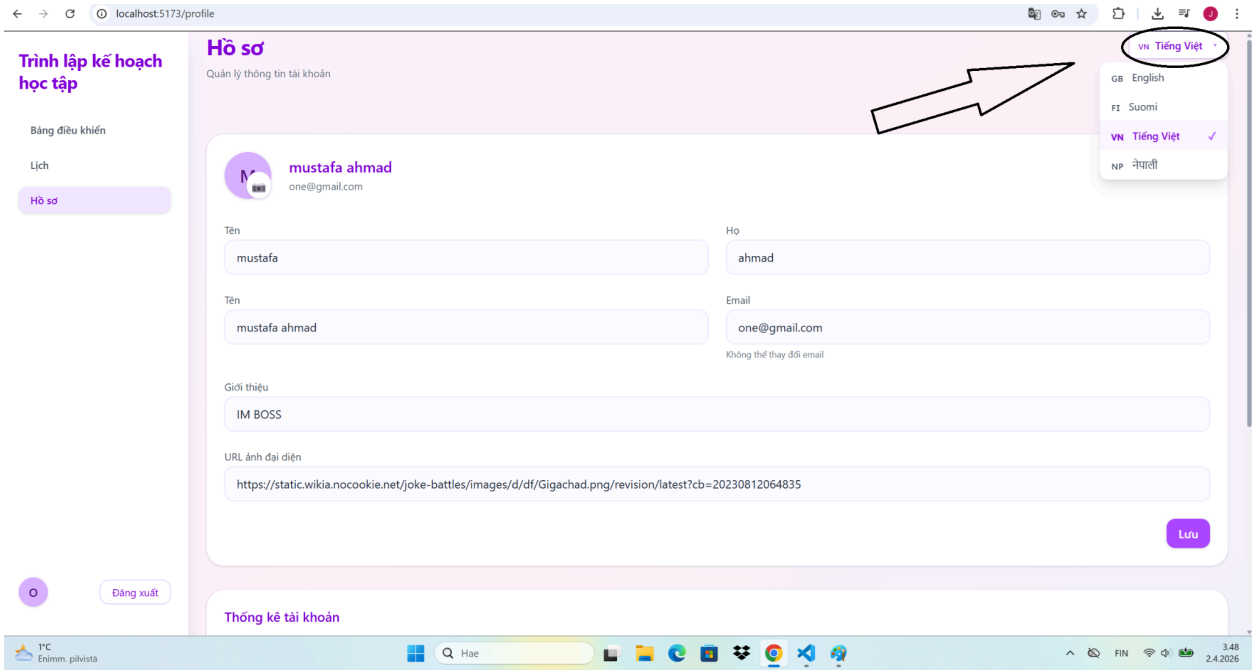
Translations were performed under supervision of each languages native speaker.

Localization usage:

There will be **two** places to change the language in this web application which will be demonstrated below.



First choice to change the language, presents itself on the landing page on top, middle of the screen(**circled button**)



Second choice to change the language, presents itself in the profile page, when logged in. It's located in the top right corner(**circled button**)

Tools used to create localization: i18next framework.

Localization setup:

Direct tutorial how localization was performed in this web application:
